

The Right Equipment For The Job

Bag Compactors

Improve air quality, control dust and reduce waste.
Run your shifts cleaner, safer, more economically.

Protect employees from dust exposure - The system features safety interlocks to provide protection from operational injuries.

Save space - The streamline design allows operation as a stand-alone unit or in combination with a Hapman bag dump/dust collector.

Air-operated system - Makes the unit safe explosion-proof or washdown areas and requires only 3 cfm (0.08 cmm) at 100 psi (7.031 kg/cm²) of compressed air.

Save time with removable container and disposable plastic liner.

Available in carbon steel or stainless steel.

Compact a pile of empty bags down to an easy-to-manage 4ft³ (.113 m³) bundle.

We're here to make a difference

a  Global company

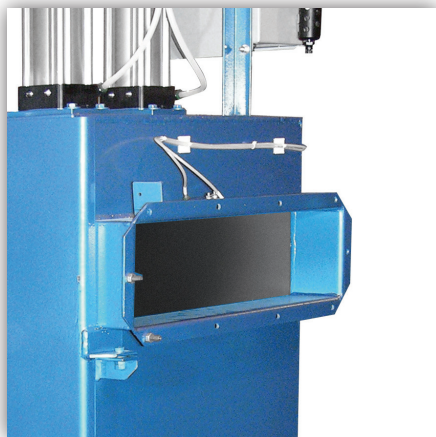

Options

Dual pneumatic rams and sturdy compaction plate compress bags consistently and efficiently.

Attach bag compactor to a Hapman bag dump station for maximum dust containment.

Bag disposal access port allows you to insert bags directly into the compactor from the bag dump station for minimum dusting.
