VACUUM CONVEYORS
CONVEY MATERIAL CONTINUOUSLY AND EFFECTIVELY.

Reduce operating costs
The highly efficient regenerative blower greatly reduces the need for plant air.

Installation flexibility
The side-door filter access gives you installation flexibility—enables you to mount it near the ceiling.

Move products in any direction
The vacuum conveyor moves material vertically, horizontally, around corners, on multiple levels and long distances with minimal operator attention or maintenance.

Clean easily between batches
Side-door filter access and tool-less filter removal make it fast and easy to clean.

The integral regenerative blower conveys material without using plant air or a separate compressor.

Maintain filter efficiency with reverse-pulse filter cleaning system.

Change filters quickly with easy-to-access side door. No tools needed.
Hapman offers a complete line of material handling equipment that easily integrates into existing systems, including:

- Flexible Screw Conveyors
- Tubular Drag Conveyors
- Vacuum Conveyors
- Feeders
- Bulk Bag Unloaders

- Bulk Bag Fillers
- Bag Dump Stations
- Lump Breakers
- And More

Note: Specifications subject to change without notice. Contact a factory sales engineer for specifications and options.

*Nominal capacity based upon 50 ft. equivalent length piping.

Options

Discharge Valves

- Rotary Valve Discharge
- Slide Gate Discharge
- Dump Gate Discharge

Positive Displacement Pump

Connects remotely to models 36 or 42, boosting conveying power and increasing material flow.

Models

MiniVac

Highly efficient Integral regenerative blower conveys your material without using plant air or a separate compressor. Available in 304 stainless steel, 316 stainless steel or carbon steel construction. Conveys up to 300 cubic feet per hour.

E-line

- Designed to protect your people and equipment from dust explosions. Filter/Receiver rated for pressures up to 14.5 psi, allowing it to be used with explosion venting or suppression systems. Available on models 24, 30, 36, or 42.

LP Series

- Designed for tight spaces where other filter/receivers cannot fit. Offers conveying rates up to 90 cubic feet per hour.
