

BAGMax™

AUTOMATED BAG UNLOADER

Protect People. Protect Product. Improve Process.

REDUCE MANUAL HANDLING

Automates repetitive bag handling, opening, and emptying.

MAXIMIZE MATERIAL RECOVERY

Shakes emptied bags to recover more material and reduce product loss.

MAINTAIN CONSISTENT FLOW

Supports steady material delivery to downstream equipment.

L SERIES

Best suited
for granular
materials.

Powered
by KAHL
Technology

FEATURES

High Capacity Unloading

Processes palletized bags layer by layer at rates of 6–20 tons per hour.

Bag Compatibility

Handles multiple bag types; paper excluded.

Automated Pallet Management

Optional pallet staging and empty pallet stacking can further automate material handling.

BAGMax™

AUTOMATED BAG UNLOADER

Protect People. Protect Product. Improve Process.

REDUCE MANUAL HANDLING

Automates repetitive bag handling, opening, and emptying.

MAXIMIZE MATERIAL RECOVERY

Shakes emptied bags to recover more material and reduce product loss.

MAINTAIN CONSISTENT FLOW

Supports steady material delivery to downstream equipment.
